We need your input for the SUIIT Hazard Mitigation Plan

What is hazard mitigation planning?
Hazard mitigation planning is the process of determining how to reduce or eliminate the loss of life and property resulting from natural hazards. As a first step in this process we are trying to gather information and opinions from Southern Ute Tribe members about natural hazards including fire, landslide, windstorms, earthquakes, floods and other natural events that could cause a loss to life and property.

What can you do?
Please take a few minutes and share your knowledge and the knowledge of your family members about the history of fire, flood, drought and other events that have happened on the SUIIT reservation.

You can record your knowledge and opinions in two ways: If you have access to a computer, go to www.surveymonkey.com/s/SUIIT_Hazards or, fill out the form below and return to the address indicated on the form.

Results will be presented on Jan. 26 from 11 a.m. to 1 p.m. in Buckskin Charlie Room (second floor) of the Leonard C. Burch Building. Tribal Members are invited to attend this lunch meeting to learn more about the Hazard Mitigation planning process.
