Title V Permit to Operate
Statement of Basis for Permit No. V-SUIT-0037-2014.01
Minor Permit Revision
June 11, 2015**

**Red Cedar Gathering Company
Homestead Compressor Station
Southern Ute Indian Reservation
La Plata County, Colorado**

Description of Permit Revision

On February 18, 2015, the Southern Ute Indian Tribe Air Quality Program (AQP) received a minor permit revision application from Red Cedar Gathering Company (Red Cedar) for the Homestead Compressor Station (Homestead). Red Cedar requested to operate a portable, 165 hp generator engine (emission unit G-101), already located on-site, as a permanent, stationary generator engine. The engine has been in operation as a portable unit for less than twelve months, since March 1, 2014.

The stationary engine is subject to the requirements of 40 CFR 63, Subpart ZZZZ for existing, non-emergency, non-black start four-stroke rich-burn reciprocation internal combustion engines greater than or equal to 100 hp and less than or equal to 500 hp at a major source of hazardous air pollutant emissions.

The AQP has added the applicable regulatory requirements of MACT Subpart ZZZZ to the Part 70 operating permit for emission unit G-101 under this minor permit revision. The AQP also took the opportunity to address some administrative items while the permit was open. Specifically, the following revisions have been made to this permit:

Section I.B. - Source Emission Points

- Updated Table 1 to include generator engine G-101
- Updated the serial number and installation date for compressor engine C-203 to reflect an off-permit change notification received on April 7, 2015 for an engine swing conducted on March 31, 2015. Red Cedar made this change under the Alternative Operating Scenario Engine Replacement permit conditions of III.C and the Off-Permit change requirements of condition IV.O.

Section II. - Site Specific Requirements

- Added 40 CFR 63, Subpart ZZZZ regulatory requirements for emission unit G-101

AQP is making these revisions as a minor permit revision in accordance with RAC 2-111(3). The permit will be reissued as permit number V-SUIT-0037-2014.01.

For specific applicability information regarding the Part 70 permit for this facility, please reference the Statement of Basis for permit number V-SUIT-0037-2014.00.
